BHADRA RESERVOIR CONSTRUCTION DIVISION, BHADRA RESERVOIR PROJECT POST.

Notification dated 8th January 1954.

To

The Firms dealing in drilling and grouting the foundations.

Subject :—Cement curtain grouting the dam foundations of Bhadra Dam across River Bhadra at Lakkavalli, Tarikere Taluk, Chikmagalur District, Mysore State.

Gentlemen,

Please be good enough to intimate your best prices and the earliest time for completing the above work in the circumstances and as per specifications detailed below :—

Cement curtain grouting is to be done in the front section of the dam for a length of 1,000 feet by boring holes, 10 feet apart staggered in three rows of 10 feet intervals. The depth of each hole in the third row lying in the axis of the dam will be about 160 feet and the grout pressure between 100 to 200 lbs. per square inch. The holes in first and second rows are to be drilled for a depth of about 20 feet and to be grouted with a pressure of 50 to 100 lbs. per square inch.

The total footage to be drilled and grouted is about 20,000. The foundation rock is made up of cleavable altered chlorite schist traversed with plenty of joints and fissures.

The drilled holes should be 1¾" or 1 7/8" in diameter for effective injection of cement.

Flushing of injection area :—The area to be injected should, just prior to the commencement of injection, be flushed with air and water to free joints and fissures from as much of the adhering decomposition products as possible thus ensuring the free travel of the grout.

Each hole should be injected with cement grout till it is completely filled and refuses to take further grout.

Water cement ratio :—The control of the grout mixture will be decided and varied by the Officer in charge of the works as and when required by the site conditions.

Mixing :—Proper precaution should be taken to see that the cement slurry is stirred throughout to the proper consistency.

Facilities by the Department:—(1) One Gardner Denver Grout pump is available and may be used for grouting work by supplementing high pressure valves, Pressure gauges, etc., (Necessary hire charges will be recovered from the bills as per rules).

(2) Compressed air will be made available to the pump up to 100 lbs. per square inch (Necessary charges will be recovered from the bills as per rules).

(3) Cement will be supplied by the Department (The cost will be recovered from the bills).

Conditions for quoting :—The work should be started immediately after the acceptance of quotations.

Withdrawal or failure to execute the work after it is accepted will entail the cancellation of the order in addition to levy of a penalty of 3 per cent of the value of order.

Rates should be quoted subject to the conditions described above for (1) Drilling and grouting the foundations per running foot.

(2) Drilling the superincumbent masonry and foundation including grouting per running foot.

Each quotation should be accompanied by a challan for having credited Rs. 5,000 towards the revenue deposits of the State as an earnest money.

The quotations should be superscribed as "Quotations for Drilling and grouting the Bhadra Dam foundations" and should reach this office before the 8th February 1954.

The firm should bind itself to the Workmen Compensation rules in vogue of the Government and empower the Executive Engineer to effect such recoveries from the bills for payment of compensation to disabled persons employed under the firm.

Any further details or clarifications can be had at the Office of the Executive Engineer, Bhadra Reservoir Construction Division, Bhadra Reservoir Project Post.
